

Assignment No 4:

Q1. What are Mode Dial in DLSR?

Answer. A mode dial or camera dial is a dial used on digital cameras to change the camera's mode. Most digital cameras, including DSLR and SLR-like cameras, support modes, selectable either by a rotary dial or from a menu. On point-and-shoot cameras which support modes a range of scene types is offered.

Q2. Explain Portriat, Landscape, Action & Macro modes?

Answer. 1. Portrait, or portraiture, is a type of photography aimed toward capturing the personality of a person or group of people by using effective lighting, backdrops, and poses. ... Frequently, portraits are commissioned for special occasions, such as weddings, school events, or commercial purposes.

2. Landscape is the art of capturing pictures of nature and the outdoors in a way that brings your viewer into the scene. From grand landscapes to intimate details, the best photos demonstrate the photographer's own connection to nature and capture the essence of the world around them.

3. Action photography addresses the quest to capture and convey motion in pictures. Our world is constantly in motion, though some things move slower than others.

4. Macro photography is simply photographing small items, often insects and flowers, but

also still life like jewelry and small household objects. Macro photography encourages the photographer to take a closer look. ... Many point-and-shoot cameras have macro modes that can capture pretty decent close-ups.

Q3. Find 5 images on the internet which are clicked in landscape and portrait mode?

Answer.
