> You can use a pop-up to ask for feedback.
> It is impossible for people to ignore the ad.

Disadvantage
> It takes away the attention on the site's main content.
> Some bloggers or website owners do not like pop-up ads.
> Pop-ups are one of the most hated forms of advertisement.

Question 2 Briefly explain what are JavaScript librairies.

Answer. JavaScript Libraries consist of functions that are used to build applications with powerful functionalities. A library has several functions, objects and methods, depending on the language.

Question 3 Briefly explain what is a carousel (or slider).

Answer .That's it! Sliders can refer to product sliders, horizontal or vertical sliders, automatic slideshows, or lightbox sliders. Carousels, on the other hand, are a specific type of slider that acts a little differently. Instead of showing a single

large image at a time, or a slider with thumbnails below it, carousels show multiple images in a row
